TOSAN TECHNO
Smart Innovation

The TECHNO M500 smart electronic payment terminal is suitable for:

Various applications in retail stores,

Delivery services,

Chain stores,

Restaurants and cafes,

Public parking lots.

Specifications

TECHSTORE Enabled

High-Performance Quad-core Processor,

High Quality Camera (Supports 1D/2D Barcode Scanning),

Multiple Connectivity Options (4G, Wi-Fi, Bluetooth),

Global Location Tracking (GPS enabled),

Reliable Battery,

PCI PTS 6.x Security Standard,

Various Types of Card Payment,
(including Chip & PIN, Magnetic Stripe & NFC)
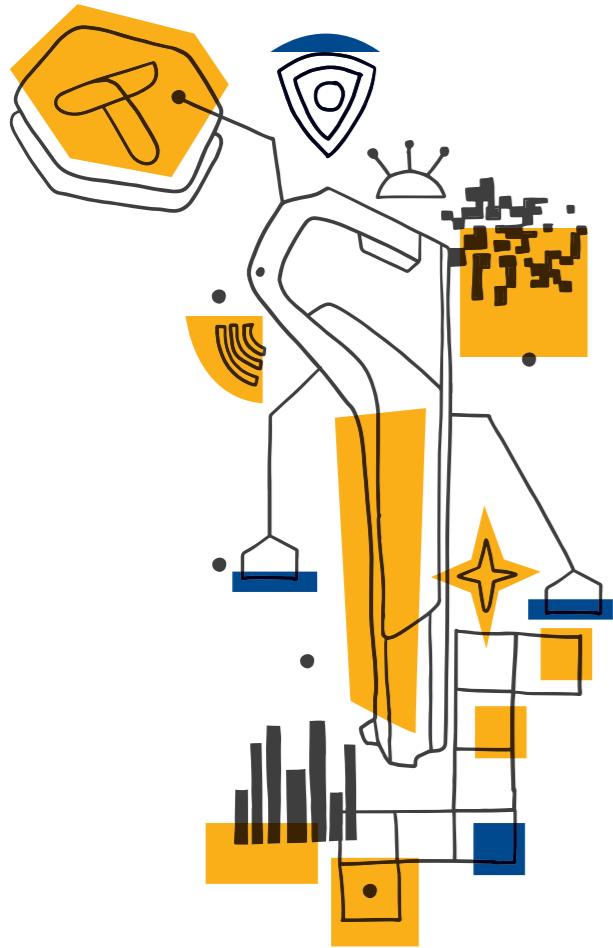

Running Latest Android Applications,

High-Quality 4 inch Touchscreen (800x480 pixels),

Improved User Experience with high Quality Keypad.

Business Capabilities

■ **Seamless Integration with TECHSTORE Platform**

The TECHNO M500 smart electronic payment terminal can seamlessly connect to the TECHSTORE platform, allowing easy and fast synchronisation of its transaction system and software updates. This ensures end-users can access the latest software versions and transaction features, providing an enhanced experience.

■ **High-Speed Transaction Processing**

With its powerful and up-to-date 4-core processor and hardware, the terminal efficiently processes electronic payment transactions at high speeds, accelerating sales operations and service delivery for various businesses and industries.

■ **Versatile Software Integration**

The TECHNO M500 smart terminal, powered by the Android transaction system, enables the installation and execution of various useful software applications. These applications can be integrated seamlessly into the terminal, providing merchants with a unified platform for managing electronic payment solutions.

■ **Robust Connectivity Options**

The terminal supports stable and advanced connectivity options, including 3G/4G mobile networks and Wi-Fi connections. This versatility ensures uninterrupted electronic payment processing, regardless of the type of internet connection available.

■ **Enhanced Payment Flexibility: Barcode and QR Code Scanning for Convenient Transactions**

Equipped with a built-in camera, the TECHNO M500 smart terminal enables innovative payment methods such as barcode and QR code scanning. This adds flexibility and convenience to the range of payment options available to merchants and customers.

■ **Maximum Transaction Security**

The terminal is designed and manufactured according to the latest security standard, PCI PTS 6.x, ensuring maximum transaction security. Cardholders and buyers can confidently process their electronic payments on this secure platform, providing peace of mind for all parties involved.

■ **Intuitive User Interface: Seamless Navigation with Numeric Keypad and Touch Screen Display**

Featuring a full and high-quality numeric keypad, the TECHNO M500 electronic payment terminal allows users to complete the purchasing process using familiar buttons, similar to traditional electronic payment terminals. Additionally, the touchscreen display of the terminal provides users with a user-friendly interface for utilising various smart card functionalities.
