Business Capabilities

TECHNO AK700 Self-service Kiosk is designed to serve as either an ordering or self-checkout device. The combination of big touch screen, barcode reader, face detection camera and a payment terminal, makes this device a complete in-store solution.

■ High-Performance Processing

Powerful quad-core processor and the hardware makes this kiosk capable of running any Android application smoothly and creates a pleasing user experience for the customers.

■ Advanced Connectivity

The device supports high-speed 4G, Wi-Fi, LAN (Ethernet) & Bluetooth connectivity. Multiple options to connect this device to Internet,

Makes the business owner sure of a well-established ordering device.

■ Easy Self-Checkout

Professional barcode reader on this device, enables customers to easily scan barcode or QR codes on their shopping items and checkout without any hesitation.

■ Innovative applications

The combination of a powerful hardware, Android OS and peripherals like face detection camera and barcode scanner, makes this Kiosk suitable for innovative business application usage and creates a well-established hardware for new business approaches like loyalty clubs and client care centers.
